

FEB 2023

On Thursday, February 23, BARC medical staff immediately tested a dog on property after it showed signs of distemper, and, per a BARC veterinarian's direction, immediately euthanized the dog to prevent the spread of disease to other shelter animals. The veterinarian's assessment was confirmed days later as the shelter received a positive distemper test result for the animal. BARC immediately implemented its distemper protocol last week by isolating any dogs that were at high risk for exposure and notifying all rescue, foster, and volunteer partners.

82% TOTAL SAVE RATE

Save Rate = The percentage of animals who leave the shelter through adoption, return to owner, transfers to other organizations, or other lifesaving program

BARC suspended public dog intake appointments while we activated quarantine protocols in response to a shelter animal that has tested positive for distemper. While public intake was suspended, BARC remained open for all other services. BARC continued to accept sick, injured, or fading animals, and Animal Enforcement Officers continued to respond to calls for service.

TOTAL INTAKE 1,178

INTAKE SOURCE*

*Intake source is defined by the way in which a pet is brought to the shelter. FIELD are pets brought in by Animal Enforcement through service calls. OTC (Over The Counter) are pets brought to the shelter by community members doing an in person drop-off

COMPARING THE DATA

We continue to see a steady increase in our adoption rates with 382 pets finding homes in January 2023 compared to 338 pets in 2022. In January we also experienced an increase in pets who went out to foster homes. Our rescue team saw a drastic drop in pets transferred to rescue with 200 less pets leaving in February as compared to the previous year.
