BEHAVIOR NOTE: Same behavior mentioned in 4/16/24 note.
Presents tense body and moves away from me when leashed. Takes slow steps out of his kennel, beginning to tremble while trying to walk towards the door. All dogs on his side were moved to the outside portion of their kennels so Cooper could walk pass the kennels without noise or distractions. He pulled me back towards his kennel, and went through his divider to the outside.

BEHAVIOR NOTE: Approaching kennel Braxton is seen sitting at the door with a fast wagging tail, slightly wiggly body and a slight smile on his face. After leashing he darts out the kennel and began with the quick/jerky movements running around my legs and jumping up in the air. At the runs he walks right in and continues the squirming and fast moving tail, as I walk away with another dog I noticed Braxton began to vocalize.

Walked well on leash around the campus. I have previously walked him with my dog when she was on campus and he did great with her. Had him in my office for a while and he would approach me with playbows. He settled on a dog bed in my office. He was panting in the office with high ears but held a waggy tail and play stance.
