

Kids Village is the Houston Department of Health and Human Services' approach to improve physical, mental, and social functioning for children and families.

It builds on existing services to create an integrated service delivery system to improve the health and well being of children.

Collaborative partnership building is a key component of the Kids Village.

Kids Village is a system of care designed to comprehensively address the needs of persons from vulnerable populations. Wraparound principles are woven through this service delivery system which provides services and supports through involved family members, collaborative services with partner agencies, and utilization of informal supports.

For more information about Kids Village, please call 713-794-2910.
