

"It is not only WHAT WE DO, but also WHAT WE DO NOT DO, for which WE ARE ACCOUNTABLE"- Moliere

Want Positive Results? Improve Accountability!

Accountability is the agent, cause or source of events that leads to results. It involves a process of seeing, owning, solving and acting; and requires a level of ownership that includes making, keeping and answering personal commitments. Organizations realize positive results, such as improved morale, reduced performance gaps, fulfilled expectations and ultimately, an increased ability to execute its objectives by creating and sustaining a culture of accountability. Accountability is the low-hanging fruit that impacts every task and defines how productively individuals work together, how much ownership individuals assume and how leaders measure performance. Building a culture of accountability fosters a sense of reality, ownership, commitment, solutions to problems and determined action that employees' exhibit in their daily work to achieve desired business results.

You should attend this panel discussion if...

- You are searching for effective ways to drive change and inspire an accountability-based culture
- You are seeking objective methods to communicate expectations and hold individuals accountable to their role
- You are aspiring to eliminate barriers that are impeding team productivity
- You are pursuing practical reward incentives to promote positive behaviors and improve performance
- You are aiming to recognize the key characteristics and traits of highly accountable people
