Chris Crump

Music is my life, passion, and profession. It is what I eat, sleep, and breathe. It has been a part of me for longer than I can recall. I have professionally played on stages since I was 10-years-old and have been doing so ever since. The stages have changed over the years but one thing stays the same: my love of entertaining. I have honed my craft over the years with a fierce intensity in hopes of becoming an artist that people can truly love, enjoy, and respect. I have a love of blues, rock, pop, rap, hip hop, R&B, and folk music. You can expect to hear these genres in each of my shows and reflected in my original music as well.

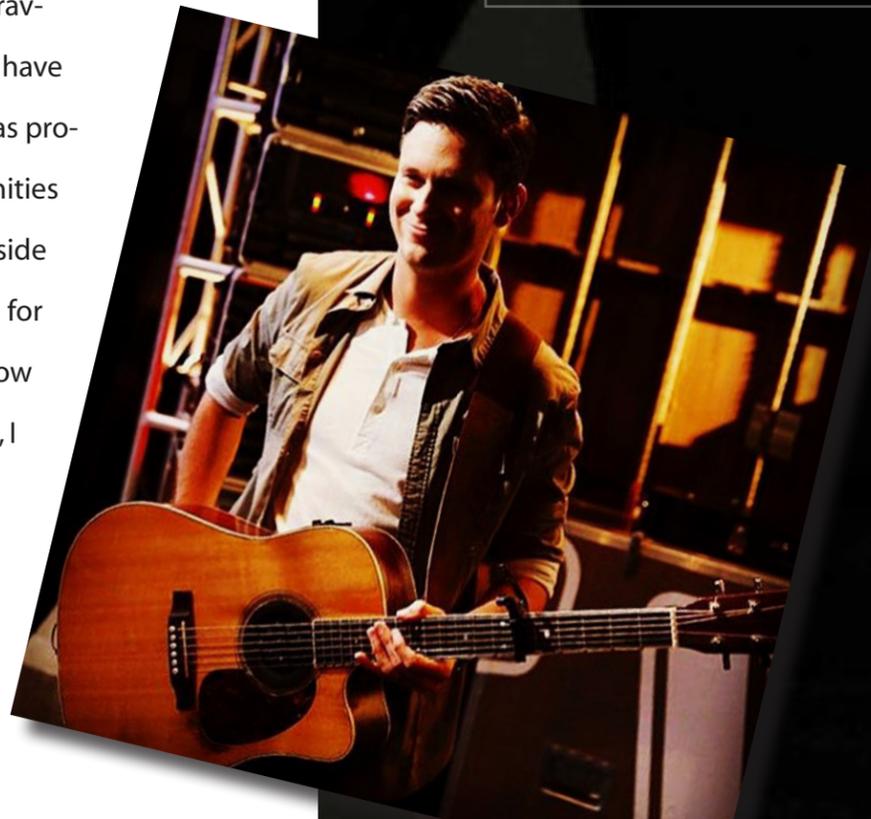

As stated earlier, my career started at a young age in a family band. We traveled and played for anyone who would have us. From those humble beginnings, I was propelled to larger settings with opportunities for more people to enjoy music alongside me. The largest, of course, was playing for millions of viewers on the hit NBC Show "The Voice". Leading up to that point, I had played festivals and shows with thousands in the crowd while there have been times where the setting was much more intimate.

led and played for anyone who would have us. From those humble beginnings, I was propelled to larger settings with opportunities for more people to enjoy music alongside me. The largest, of course, was playing for millions of viewers on the hit NBC Show "The Voice". Leading up to that point, I had played festivals and shows with

thousands in the crowd while there have been times where the setting was much more intimate.

In 2010, I won the "Male Vocalist of the Year" award and was runner-up for "Song Writer of the Year" at the GMAs in Nashville, TN. Still know that, whether I play for an audience of millions or in a room with less than 10 people, I play my heart out because of my love for music and entertainment.
