## City of Houston

## Evaporative Credits Internal Audit

Utility Customer Service, Department of Public Works and Engineering

Office of the City Controller<br>City of Houston<br>Texas

Annise D. Parker
October 7, 2004
The Honorable Bill White, Mayor
City of Houston, Texas
SUBJECT: Public Works and Engineering Department - Utility Customer Service Evaporative Credits Internal Audit (Report No. 04-22)

## Dear Mayor White:

In accordance with the City's contract with Jefferson Wells International (JWI), JWI has completed an internal audit of evaporative credits given to the Public Works and Engineering Department's (PW\&E) customers from the period August 1, 2002 through October 31, 2003. This engagement was initiated and conducted at the request of PW\&E management. The objectives of the engagement were to assess compliance with the Evaporation Credit Ordinance No. 47-129; assess compliance with the Department's policies and procedures related to the credits; validate the supporting documentation for credits paid; and assess risks within the program and suggest opportunities for improvement.

The report, attached for your review, noted several observations and recommendations that would benefit the City as well as the customers. Department management responses are included in the body of the report as well. Draft copies of the matters contained in the report were provided to department officials.

We commend the Department for pursuing this audit and taking immediate steps to implement the recommendations. Also, we appreciate the cooperation extended to the JWI auditors by department personnel during the course of the audit.

Respectfully submitted,

Annise D. Parker
City Controller
xc: City Council Members
Anthony Hall, Chief Administrative Officer
Michael Moore, Chief of Staff, Mayor's Office
Michael S. Marcotte, Director, Public Works and Engineering Department
Judy Gray Johnson, Director, Finance and Administration Department

August 2, 2004

Ms. Annise D. Parker
City Controller
City of Houston
901 Bagby, $8^{\text {th }}$ Floor
Houston. TX 77002
Dear Controller Parker:
We have completed the internal audit of Evaporative Credits given to the Public Works and Engineering Department's customers from the period August 1, 2002 through October 31, 2003, as outlined in our engagement letter dated December 18, 2003, under Contract No. 51783. This report documents our final report and completes the services agreed to be provided by Jefferson Wells International (Jefferson Wells) as described in the engagement letter.

Our observations and recommendations noted during the performance of the procedures, as well as management's responses, are presented in this report. Our procedures, which accomplished the project objectives, were performed through March 5, 2004 and have not been updated since that date. Our observations included in this report are the only matters that came to our attention, based on the procedures performed.

Jefferson Wells is pleased to have assisted the Public Works and Engineering Department (the Department), and we appreciate the cooperation received during this engagement from the Department and the City Controller's Office.

This report is intended solely for the information and use of the City, the Department, and the City Controller's Office and is not intended to be used for any other purpose.

Lisa D. Anderson

Exhibit A - Summary Calculation Log

## Executive Summary

## Background

The City’s Evaporative Credit Ordinance Sec. 47-129 (Ordinance) was enacted to give credit to those customers whose water intake includes water that evaporates through cooling towers or is used to manufacture a product, and does not discharge such water into the sanitary sewers of the City.Eligible customers receive an EVAP Credit on their monthly utility bills for the difference between the original sanitary sewer charge on the customer's monthly utility bill and a recalculated charge based on sub-meter readings provided by the customer.During the period August 1, 2002 through October 31, 2003, the program was comprised of 837 sub-meter customers with remittance of $\$ 12,732,936$ in EVAP Credits.Since the inception of the EVAP Credit program, the City, and ultimately its citizens, has subsidized the administration of this program.

## Business Opportunities

Automate - Significant technological advances have occurred since the inception of the program - such as the City's automatic meter reading of its water meters. As the City already automatically reads water meters at the EVAP customer locations, the City could automate the reading of the sub-meters as well. This would benefit the City as well as the EVAP customers.

## Executive Summary (continued)

## Benefit to the City:

$\square$ The electronic sub-meter read information would be downloaded into the Utility mainframe where the EVAP credit could be automatically calculated and included in the customer's Utility Bill,Reduction of City costs incurred to calculate, process, and research the EVAP Credits,Reduction of the costs to maintain and store the EVAP credit files as the data would be stored electronically,Potential elimination of erroneous or questionable reads, andReduction of calculation errors.
Benefit to the EVAP Credit customers:Eliminate sub-meter monitoring costs, including the completion, submission and correction of Read Sheets,Eliminate the loss of credits due to failure to submit monthly Read Sheet, andReduction of credit errors.

Service Charge - Based upon a rough estimate of the percentage of time devoted to the administration of the EVAP Credit Program by City personnel including salary, benefits, and vehicle costs used for site visits, this program costs the City at a minimum $\$ 200,000$ per year. Other identifiable costs that have not been quantified include computers, and related support, paper products, telephones, FAX machines, third-party record storage, postage, and salary/benefits for the accounting personnel that make entries for the manually calculated EVAP Credits. The City should consider passing these costs on to the customers that are benefiting from this program as an annual fee per sub-meter.

## Project Scope and Objectives

## Scope

This internal audit included reviewing every EVAP Credit paid during the period August 1, 2002 through October 31, 2003.

## Objectives

The project objectives were to:Assess compliance with the Evaporation Credit Ordinance No. 47-129,Assess compliance with the Department's policies and procedures related to the credit,Validate the supporting documentation for credits paid, andAssess risks within the program and suggest opportunities for improvement.

## Procedures Performed

Conducted a kick-off meeting and obtained background information.Developed an understanding of the evaporation credit ordinance, documentation flow between the customer and the Department, and current policies and processes to support compliance with the Ordinance through a review of documents and short discussions with personnel responsible for obtaining and processing the evaporation credits to further understand the process and potential issues.Obtained a listing from the Department identifying the population of accounts receiving evaporation credits during the internal audit period.Reviewed appropriate files for each account on the listing obtained above and confirmed:Evidence of certified meter calibration performed at least annually by a licensed plumber,
Evidence of customer submitted readings for all readings entered into the system,
Evidence that credits were not processed for periods in excess of two months,
Changes in meter numbers were supported with termination readings of the old meter,
Support for any adjustments, and
Evidence of review and approvals pursuant to the Department's written policies and procedures.

## Procedures Performed (continued)

For each monthly reading, recomputed, and documented the evaporative credit - identifying any recovery opportunities,Reviewed the credit history reports by account for unusual amounts,Assessed compliance with the Evaporation Credit Ordinance No. 47-129,Assessed compliance with the Department's policies and procedures related to the credit,Conducted other inquiries or analysis to further analyze the existing control environment and identified opportunities to strengthen controls,Created a support file needed for the Department to recover credit overpayments, andSummarized test results, observations and recommendations in this internal audit report.
## Observations, Recommendations, and Management's Responses

| Ref. \# |  |  |  | servat |  |  | Recommendation | Management's Response |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1) | EVAP Program Administrative Costs: <br> The City's cost to administer this program exceeds $\$ 200,000$ per year. The computation below considers the salary, benefits, and vehicle costs for the seven program personnel: |  |  |  |  |  | As provided by the program, customers should not have to pay for the sanitary sewer charges related to water intake that is not discharged into the City's sanitary sewer. However, the City should not have to subsidize the program. <br> Annually, we recommend the Department perform a program cost analysis and recover program administration costs by charging program participants an annual fee per sub-meter. <br> Note: If the City automates this process, the program costs will drastically decrease. However, the City should still recover any remaining program costs from the program participants. | We concur with the recommendation. We will seek relevant revisions to the existing ordinance this fiscal year. Once the ordinance is revised, we will complete programming changes to accommodate the new process, while allowing adequate time for customers to retrofit or replace their existing submeters. <br> In determining the initial annual costs for participation, we anticipate analyzing program administration costs as well as the average annual maintenance costs for sub-meters types to assure full cost recovery. Thereafter, the annual fee should be reviewed periodically and adjusted to assure that all costs to the City are recovered. |
|  |  | \% of <br> Time | Bi-weekly with Benefits | Annual Gross Cost | Vehicle Costs | Total |  |  |
|  | 1 | 1 | 3,705.40 | 964 | N/A | 964 |  |  |
|  | 2 | 33 | 3,371.48 | 28,927 | N/A | 28,927 |  |  |
|  | 3 | 75 | 1,926.15 | 37,560 | N/A | 37,560 |  |  |
|  | 4 | 100 | 1,464.95 | 38,089 | N/A | 38,089 |  |  |
|  | 5 | 67 | 1,510.81 | 26,319 | 6,968 | 33,287 |  |  |
|  | 6 | 75 | 1,446.55 | 28,208 | 7,800 | 36,008 |  |  |
|  | 7 | 47 | 1,507.95 | 18,427 | 4,888 | 23,315 |  |  |
|  |  |  |  |  |  | 198,150 |  |  |
|  | Other identifiable program costs in addition to the above costs include: computers and computer support, paper products, telephones, fax machines, third-party record storage, postage, and the salary/benefits for the accounting personnel that book the credits that have been manually calculated. |  |  |  |  |  |  |  |

## Observations, Recommendations, and Management's Responses

| :---: | :--- | :--- | :--- |

## Observations, Recommendations, and Management's Responses

| Ref. $\#$ (cont.) | Observation | Recommendation | Management's Response |
| :---: | :---: | :---: | :---: |
| 2) | During our testing of the Calibration Certifications, we noted the following issues of non-compliance: <br> a) The City accepted Calibration Certifications that had not been signed by the customer and/or a licensed plumber. <br> b) The City accepted Calibration tests that were not conducted by licensed plumbers. <br> c) The City does not require Calibration Certifications to be sent by certified mail. <br> d) Late submissions of Calibration Certifications were accepted with no penalty to the customer, and <br> e) The Department's form did not include key Ordinance elements such as plumber's license number and tolerance levels. | We concur with the Department that the submission of the Calibration Certifications by certified mail is an unnecessary burden to its customers. The Department requires these submissions to be faxed. <br> The Department should also consider including in its Calibration Certification the request for meter replacement information. <br> Note: See Ordinance Change Considerations, which could eliminate the requirement for Calibration Certifications. | (See previous page) |

Observations, Recommendations, and Management's Responses

| Ref. | Observation | Recommendation | Management's Response |
| :---: | :---: | :---: | :---: |
| 3) | Ordinance Non-Compliance - Read Sheets: <br> As stated in the Ordinance, "Such monthly readings shall be furnished on forms provided by the utility official and sworn to as correct by the person taking the reading." <br> We noted that the Department is not enforcing the submission of the Read Sheet on a monthly basis. Rather, the Department has an internal policy that allows for the "bridging" of one month if a Read Sheet is not submitted. We noted that the Department remitted credits during the internal audit period totaling $\$ 716,156$ by bridging Read Sheets. | As bridging is not an element of the Ordinance, we recommend that the Department only give credits if the customer submits a Read Sheet on a monthly basis. <br> The wording related to the Read Sheets in the Ordinance should be clarified to specify when the Read Sheet is required to be submitted and that the credit related to a Read Sheet that is not submitted within the required timeframe will not be granted. When a Read Sheet is late, the ending read will be used as the beginning read on the next month's Read Sheet. When a Read Sheet is missed, the ending read from the next Read Sheet submitted will become the beginning read for the next month. <br> Note: If the City automates the sub-meter reading, these issues should be eliminated as the customer will no longer be required to submit Read Sheets. | The ordinance specifies that the city "will accept monthly readings from such meter taken and provided to the city by such person or his duly authorized agent". The decision to bridge monthly readings was based upon the premise that the missing month's consumption could be computed by the current reads from the prior and post months. This maintained the spirit of the requirement and allowed monthly consumption to be reviewed for analysis purposes. This issue will be clarified either by the automation of the program or with changes to the existing ordinance. |

INTERNATIONAL

## Observations, Recommendations and Management's Responses

| Ref. \# | Observation | Recommendation | Management's Response |
| :---: | :---: | :---: | :---: |
| 5) | EVAP Program Calculation Errors <br> We noted the following type of errors during the internal audit: <br> - Credits for periods not covered by a calibration certification, <br> - Credits denied in error, <br> - Wrong rates used in manual calculations, <br> - Data entry errors, and <br> - Read Sheet errors. <br> See Exhibit A - Summary Calculation Log | See the recommendations above for Noncompliance with Department Procedures. <br> Note: If the City automates the meter reads and this process, calculations would be performed automatically, which should eliminate the calculation errors noted as well as save program administration costs. | See the COH Response to \#4. The employee primarily responsible for the credit computations was relocated and an additional level of management has been inserted into the review process. Before employee changes were made, adjustments were often delayed necessitating manual money change requests. Manual adjustments are more vulnerable to errors and should be minimized. The section is now more consistently current with processing. <br> Automation would eliminate the majority of the need for any manual processing of these credits. |

## Observations, Recommendations, and Management's Responses

INTERNATIONAL

## Observations, Recommendations, and Management's Responses

| Ref. <br> \# | Observation | Recommendation | Management's Response |
| :---: | :---: | :---: | :---: |
| 7) | Lack of Audit Trail: <br> During our review, we encountered problems verifying calculations due to poor documentation trails. For example, there were instances where no audit trail existed to support disallowance of credits and discrepancies between the City's calculation and data on a customer's read sheet. <br> See Exhibit A - Summary Calculation Log | Even if the City automates this process, there will be instances where manual intervention and customer contact must be made, which should be fully documented. The City should fully document reasons for manually overriding the system, disallowing a credit, entering data contrary to customer's reads and all exchanges with customers within the TR screen. As the City limits the amount of history that can be viewed in the TR screen, a hard copy of the TR screen should be printed and filed in the account folder for ease of reference. | We concur with the issues noted regarding audit trails. As noted earlier, all documentation is now being scanned for secure retention. Historical entries on the TR screen are available on microfilm for use in investigations. |
| 8) | Customer Documentation Errors: <br> During our review, we noted instances when the documents submitted to the City had errors that required the City to send letters, and follow-up. There were occurrences of this cycle being repeated several times for one read sheet, at no cost to the customer. | We recommend the City automate the meter reads which should eliminate these problems, as the customer would no longer be required to submit read sheets or calibration certifications. | We concur with the recommendation. The use of customer submitted read sheets and manual adjustment calculations are more vulnerable to error. The automation of this system would eliminate the necessity of customer submitted data and the vast majority of manual adjustments. |

## Ordinance Change Considerations

$\square$ The Ordinance already requires that EVAP customers pay the costs of installing a sub-meter. Automated reading of sub-meters would require some sub-meters to be replaced by City approved meters, including remote reading devices. In addition, some of the existing sub-meters may be able to be retro-fitted with remote reading devices.
$\square$ The EVAP customers would no longer be required to submit monthly Read Sheets as this would be automatically performed by the City.
$\square$ Although the automation will greatly reduce the EVAP program costs to the City, it will not eliminate all program administration costs. The Ordinance should include an annual fee per sub-meter based on the actual costs to the City to administer this program. The wording in the Ordinance should be written to enable the City to increase or decrease the annual fee without requiring an Ordinance amendment.
$\square$ The sub-meters should be owned by the City. This would give the City more control to monitor the sub-meters for tampering, and control over needed repairs.
$\square$ The EVAP customers should no longer be required to perform and submit yearly calibration certifications. The City should be able to generate sub-meter exception reports that would identify reads that appear outside of the normal range, and require further investigation by field inspectors. Any repairs required to be made would be charged to the respective EVAP customers.
