

CERTIFICATE OF APPROPRIATENESS

Applicant: Isaac Benton, owner / Yvette Solares, agent

Property: 7603 Glen Vista St, lot 10, block 66 in the Glenbrook Valley Subdivision.
The property includes a historic 2,602 square-foot, one-story wood-frame single-family residence, situated on a 5,000 square foot (50' x 100') interior lot.

Significance: Non-Contributing Tudor ranch style residence, constructed circa 1965, located in the Glenbrook Valley Historic District.

Proposal: Alteration – Windows:

The applicant proposes to replace the original aluminum windows with Renewal by Anderson windows:

- Removal of existing original, aluminum windows (at the front of home)
- Installation of Renewal by Andersen Fibrex windows
- Three windows (#s 101, 102,106) will be double hung, recessed, with a 1-over-1 lite pattern
- One window (#104) will be a picture window, recessed with no lite pattern
- One window (#105) will be a gliding window, recessed with a 1-over-1 lite pattern
- All windows will be sandstone in color
- The existing windows currently have broken glass, air leakage, condensation, and sill rot

Public Comment: No public comment received.

Civic Association: No comment received.

Recommendation: Denial - does not satisfy criteria 1(b)

HAHC Action: -

APPROVAL CRITERIA

ALTERATIONS TO NONCONTRIBUTING STRUCTURES

Sec. 33-241.1(b): Director shall issue a certificate of appropriateness for the alteration, rehabilitation, or restoration of a non-contributing structure or an addition to a noncontributing structure in an historic district upon finding that the application satisfies the following criteria, as applicable:

S D NA S - satisfies D - does not satisfy NA - not applicable

(1) For an alteration, rehabilitation, or restoration that does not require the removal or replacement of the structural elements, not including the foundation, within 67 percent of the structure:

[] [] [x] (a) The proposed activity must recognize the building, structure, object or site as a product of its own time and avoid alterations that seek to create an earlier or later appearance; and

[] [x] [] (b) The proposed activity must match the architectural features, materials, and character of either the existing noncontributing structure or the contributing structures within the context area.

The proposed windows do not match the character of the windows in either the existing non-contributing or the contributing structures in the district.

If the director finds that an application for certificate of appropriateness pursuant to this subsection does not satisfy the applicable criteria, or that the application does not satisfy the general intent and purposes of this article, the director shall refer the application to the HAHC for consideration (Sec. 33-241.1 (c)).

[] [] [x] (2) For an alteration, rehabilitation, or restoration that requires the removal or replacement of the structural elements, not including the foundation, within 67 percent or more of the structure, the director shall refer the application to the HAHC, which shall approve a certificate of appropriateness if the result of the project conforms to the requirements for new construction in a historic district in section 33-242 of this Code.

(3) For an addition to a noncontributing structure:

[] [] [x] (a) The distance from the property line to the front and side walls, porches, and exterior features of any proposed addition or alteration must be compatible with the distance from the property line of similar elements of existing contributing structures in the context area; and

[] [] [x] (b) The noncontributing structure with the constructed addition is compatible with the typical proportions and scale of existing contributing structures in the context area.

Gliding Triple Window | White Interior

What are Renewal by Andersen® windows made of?

All of our windows are made of Fibrex® material, a revolutionary composite made from reclaimed wood fiber blended with a polymer. This gives our windows the strength and durability of wood and the low-maintenance features of vinyl, while greatly limiting thermal transmittance found in other window materials such as metal.

Unlike many other window materials, Fibrex composite material won't flake, rust, blister, peel, crack, pit, or corrode.¹ It is also two times stronger than vinyl and resists warping and bowing. Never worry about scraping or painting your windows again.
